

WHAT: Join us for a two-part high performance building workshop sponsored by the Alabama Department of Community & Economic Affairs (ADECA) and Southface! You'll learn the following:

- How to implement high performance design strategies for new building design and major energy upgrades to existing facilities.
- Building science-based strategies for achieving tight building envelopes, plus energy-efficient HVAC and lighting systems.
- How to diagnose and address poor performance, and continually track and improve building energy results.
- An overview of the major market drivers for energy efficiency such as Leadership in Energy and Environmental Design (LEED), ENERGY STAR, the 2030 Climate Challenge, and the ASHRAE Energy Design Guide.

WHO: This workshop is ideal for architects, engineers, contractors, building owners and operators, product manufacturers and vendors, real estate professionals, the commercial building finance industry, and building code officials. The High Performance Building: Operations & Maintenance Workshop also targets those working in building commissioning, energy monitoring, facility management and building operations and maintenance.

WHEN: April 26 & 27, 2010, 8:30 am - 5:00 pm.

WHERE: ABC Birmingham

1830 28th Avenue South
Birmingham, AL 35209

Only \$50 per workshop or \$75 for both • Continuing education units available • Lunch will be provided
